6. Accommodation and Facilities for Ante-Mortem Inspection.

All commercial enterprises engaged in the slaughter of livestock, the preparation of meat, the processing of carcasses, meat, carcases products or meat products derived therefrom for export from or import into Ethiopia shall be required to register with the Ministry of Agriculture.

## 6. Accommodation and Facilities for Anti-Mortem Inspection.

- (1) Accommodation and facilities for Ante-Mortem Inspection shall be provided by owners of abattoirs and establishments in the following manner:

  - (a) Enough pens shall be made available for holding livestock awaiting slaughter to accommodate the maximum daily kill.
  - (b) Pens and passages shall be paved with impermeable non-slip material, be furnished with a piped water supply and sufficient hose for cleaning, and be properly drained in a direction away from the slaughter buildings.
  - (c) Fixed water troughs shall be fitted in each pen, affording adequate access for the numbers accommodated.
  - (d) Facilities to restrain livestock for manual examination shall be provided when required by the Inspector.
  - (e) Where slaughtering regularly takes place at night, permanent installation for artificial lighting, adequate for efficient inspection, shall be fitted in the pens holding livestock awaiting slaughter.
  - (f) An emergency slaughter room, including an isolation pen, separate from the main slaughter hall, shall be provided for the slaughter of sick or injured livestock.

(2) The slaughter pens shall be used only for the detention of livestock awaiting slaughter within twenty-four hours, and shall be thoroughly cleansed before the entry of livestock.

### Post-Mortem Inspection Facilities

- (1) The following facilities shall be made available for the purpose of Post-Mortem Inspection by owners of abattoirs or establishments:—

  - (a) adequate facilities required for inspection.
  - (b) adequate natural and artificial lighting, in all rooms or places where meat and meat products are handled or processed.
  - (c) racks or other suitable devices for retaining, and ensuring the identification of, all offals until inspection is completed;
  - (d) separate lockable facilities for the detention of carcasses ordered by the Inspector for further inspection;
  - (e) racks, tables, platform and other equipment for the performance of inspection, whose design, material and construction shall enable the Inspector to work in a ready, efficient and clean manner;

የቆመዋል :

- (a) The carcasses of all livestock slaughtered in  
any abattoir or establishment shall be made  
readily available for inspection.
- (b) Post Mortem Inspection follow as soon as pos-  
sible after slaughter, allowing time for efficient  
bleeding, and ensuring that there is no delay  
before evisceration.
- (c) The carcass shall be dressed and treated in such  
a manner so as not to prevent or hinder inspec-  
tion in accordance with these Regulations and  
in particular no action shall be taken which  
might alter or destroy any evidence of disease  
except on the instruction of an Inspector.
- (d) When any part of the evisceration of the car-  
cass takes place before the complete separation  
of the hide or skin, the carcass shall be thorou-  
ghly washed before the evisceration takes place.
- (e) When examining the carcass of any livestock  
the Inspector shall examine the following:
- (i) the state of nutrition;
  - (ii) any local or general oedema;
  - (iii) any swelling deformity or other abnor-  
mality of bones, joints — muscular or  
umbilicus;
  - (iv) the age and sex of the animal from which  
it was derived;
  - (v) any abnormal odour;
  - (vi) the condition of the pleura and perito-  
nium;
  - (vii) any other evidence of abnormality.
- (f) The offals shall be inspected as soon as possi-  
ble after removal from the carcass.
- (g) The musculature shall be examined visually  
and incised if necessary. In the case of a bovine  
animal one deep incision shall be made into  
the triceps muscle of each shoulder and further  
incisions may be made into the carcass muscu-  
lature at the discretion of the Inspector.
- (h) Any Inspector who incises a diseased part shall  
avoid as far as possible contaminating the healthy  
parts of the same carcass.
- (i) Any carcass found to be free from disease, well-  
nourished and in sound and wholesome condi-  
tion shall together with its edible parts be passed  
as fit for human consumption, and marked  
by the Inspector with the official stamp of ap-  
proval.
- (j) Any carcass from which the diseased parts have  
been removed under the supervision of the In-  
spector, thereby qualifying as fit for human  
consumption, shall be marked by the Inspector  
with the official stamp of approval.
- (k) Whenever it is impossible to make an imme-  
diate decision regarding a carcass or offal, the  
relevant items shall be retained for more de-  
tailed examination.

(iii) examine the oesophagus;

(iv) incise and examine the crura of the dia-phragm;

(v) examine in detail the bronchial and me-diastinal lymphatic nodes of any bovine animal, or pig unless he is satisfied, with-out doing so, that the nodes are diseased;

(vi) in the case of any bovine animal, open the pericardium and examine the heart mus-cles, and open the heart by an incision through the left ventricle and, if he con-siders it necessary, make further incisions into the heart wall from the inside.

(d) Examination of the Udder.

The Inspector shall—

(i) incise the udder and examine the udder of a cow or sow by observation and palpa-tion and shall examine, in detail the su-pramammary lymphatic nodes;

(ii) in the case of any female animal, other than a cow or a sow examine the udder by observation and palpation and, if he considers it necessary, incise the udder and examine the supramammary lymphatic nodes.

(e) Examination of the Male Reproductive Organs.

The Inspector shall examine the male repro-ductive organs of any animal as he deems it ne-cessary.

(f) Examination of the Feet.

In the case of any bovine animal or pig, the Inspector shall examine the feet should he de-mand it necessary to do so.

(g) Examination of Carcass Lymphatic Nodes.

In the case of any adult bovine animal, the In-spector shall examine in detail the prescapular, precrural, ischiatic and iliac lymphatic nodes.

10. Additional Examination Where Tuberculosis is Suspected.

(1) Where the Inspector has reason to suspect that any part of the carcass or offal of any livestock is infest-ed with tuberculosis he shall—

(a) in the case of any carcass, require the carcass to be split, examine its vertebrae, ribs, sternum, spinal cord and, if he considers it necessary, the brain, and expose, if a lesion of the kidney is visible or suspect, incise the kidney;

(b) in the case of the carcass of any bovine animal examine in detail the superficial inguinal, supramammary, propectoral, presternal, supraster-nal, xiphoid subdorsal, intercostal, prescapular, iliac, sublumbar, ischiatic, precrural and pop-iteal lymphatic nodes.
